MEMORANDUM OF AGREEMENT

In order to facilitate support by the Intelligence Community to the Department of Energy's nuclear weapons development at the government-owned contractor-operated National Laboratories (Lawrence Livermore, Los Alamos, and Sandia), the following exception to intelligence dissemination policy is established:

CIA-originated intelligence documents, classified at the collateral level, which bear the WNINTEL marking, may be disseminated to National Laboratory personnel outside the intelligence elements, provided that:

- a. The Senior Intelligence Officer of the Department of Energy has determined their need to know and their current eligibility to meet DCID 1/14 security standards.
- b. The Senior Intelligence Officer of the Department of Energy will maintain a listing of such Laboratory personnel approved to receive such material.
- c. A dedicated area of the Laboratories, either inside or outside the intelligence elements, but which meets the SCIF standards established by NFIB/NFIC 9.1/47 will be used for the storage and review of this material.

STAT This agreement is subject to periodic review by either party and to inspection by the Central Intelligence Agency for compliance. It does not affect the dissemination of Sensitive Compartmented Information (SCI) or other controlled material which will be governed by existing procedures.
